

# Donald's Creek Fish Bunting Template

*Measurements: whole fish is approximately 22.3cm long x 8.7cm wide (across widest point)  
Follow "How to make double-sided fish bunting", steps 1-5 to make one or more  
doublesided fish and fish bunting.*

*Please note: the fish template is not completely symmetric, therefore if you decide to cut multiple pieces before you glue them all on, remember to test your cut out pieces of paper to make sure they fit, before you apply glue (especially after you turn the fish over)  
You can always trim little bits off with scissors after they are all glued on.*
